EE207 – LOGIC DESIGN LABORATORY

(2018 – 2019 Fall)

LABORATORY REGULATIONS

Preliminary Work:

A preliminary work, which should be studied in order to learn the content of the experiment, will be assigned for each experiment. Preliminary works will be either reading assignments or tasks to be implemented and print out. If a print-out preliminary work is required for that experiment, each student in a group will prepare an individual preliminary work and those preliminary works will be collected after the laboratory session and will be graded. **YOU WILL NOT** be allowed to do the experiment without that print-out work.

Report:

All the measurements must be completed during the experiments and the results must be noted carefully before leaving the laboratory. A formal report about the experiment should be prepared after the experiment and submitted to the instructor. Each team of two students will submit one report.

Written & Practical Midterm Exam:

A written & practical examination will be given by the end of semester at the laboratory. The exact date will be announced by the department. This examination will include the theoretical and practical concepts covered in the laboratory.

There is no break during the experiments!!

Equipment:

Each team will have a specific workbench and will be responsible from all the equipment of that bench. Also, exchanging of equipment is not allowed among the tables without the permission of the instructor. In order to write measurements and notes about the experiment A4 white papers are required. Calculator may be used during the experiment.

Attendance:

The students should attend all the experiments and all introduction sessions. **Those who miss three of them without any allowable excuse (medical report or coinciding exams) will directly be graded by NA. Only two medical reports will be accepted and for them only one makeup will be given.** No student will be allowed to take lab. in another lab. section other than his own for any reason [other than a medical report and any conflicting exam].

No more than fifteen minutes of delay is acceptable for students coming to laboratory session.

If you have a medical report or a conflicting exam, you should consult your instructor with a written formal request and your request will be assessed whether you will be given a makeup.

Papers indicating that you were at the health center during your experiment time will not be counted as a medical report.

Syllabus:

There are 9 experiments. Experiments start on October 8th.

Course Webpage:

The official webpage of the course is

"https://akademik.adu.edu.tr/fakulte/muhendislik/personel/ismail.yarici/dersler"

Also, the students are responsible for regularly checking their email for further announcements.

Grading:

- Attendance: 5%
- Laboratory Performance: 20 %
- Preliminary Works + Reports: 50 %
- End of Term Examination (Written & Practical): 25 %
